Education

Pimpri Chinchwad College of Engineering (PCCOE) **Pune, India**
Bachelor of Technology in Computer Engineering *Aug. 2023 – June 2027*
Relevant Coursework: Artificial Intelligence, Machine Learning, Deep Learning, Computer Vision, Data Structures & Algorithms, DBMS, Operating Systems, Object Oriented Programming, Computer Networks

Technical Skills

Languages: C, C++, Java, Python, R, SQL, HTML, CSS, Javascript
Databases & Backend: Schema Design, MongoDB, MySQL
AI/ML: TensorFlow, Keras, scikit-learn, Numpy, Pandas, Computer Vision, Neural Networks, NLP, LLMs
Tools: Git, GitHub, Linux (Ubuntu), AWS, VS Code, Figma, Google Colab, PowerBI, Postman API, Docker

Projects

Crop Recommendation System | *Python, Flask, Decision Tree, KNN, K-Means, ML* **Source Code**
- Built a multi-model ML pipeline using **Decision Tree, KNN, and K-Means** trained on **2,200+ samples** across **22 crop categories** to recommend optimal crops based on soil and climate features.
- Achieved **97%+ classification accuracy** with Decision Tree and KNN models, validated using train-test split and label encoding with StandardScaler normalization.

AI-Powered Mental Wellness & Support Platform
React.js, Node.js, Express.js, Socket.io, LLaMA 3, LangChain, MongoDB Atlas, REST API **Source Code**
- Engineered an AI query pipeline leveraging **LLaMA 3 (70B)** via **LangChain** framework, persisting session data and scalable user records in a high-availability **MongoDB Atlas** database.
- Recognized with an official **Government of India Copyright** for design and technical implementation in delivering secure, automated mental health support.

Eye Strain Detection System | *Python, Deep Learning, OpenCV, TensorFlow/Keras, Computer Vision* **Source Code**
- Implemented **CNN-based eye state classification** (open/closed) combined with **Eye Aspect Ratio (EAR)** for robust blink detection and fatigue analysis.
- Achieved **90% accuracy** on eye state detection and computed real-time blink rates to assess fatigue.
- Designed an automated **alert system** for low blink rate and eye closure, reducing strain risk by **30–40%**.

Research Experience

Undergraduate Research – Medical Imaging (ROP Detection) **Pune, India**
- Conducted research on automated detection of Retinopathy of Prematurity (ROP) using retinal fundus image datasets.
- Applied **CNN-based models** with advanced preprocessing techniques (CLAHE, normalization), achieving strong diagnostic performance in medical imaging tasks.

Experience

Intern – Deloitte | *CLM, API Integration, Functional Technologies* **Sep. 2026 – Present**
- Working with **Contract Lifecycle Management (CLM)** solutions, including **DocuSign, Icertis, and Sirion**, to understand contract workflows and enterprise processes.
- Supporting **API integration** and functional activities to facilitate data exchange and interoperability between enterprise applications.

UI/UX Intern – PISTU | *Figma, Prototyping, Wireframing, Design* **May 2025 – Jul. 2025**
- Designed **high-fidelity wireframes** and **10+** Figma prototypes, improving user flow and visual consistency.
- Collaborated with cross-functional teams in a **hybrid** setup to deliver production-ready UI components on time.

Achievements

- **Salesforce Trailhead** Completed 100+ hours of Salesforce learning modules, earning 50,000+ points and achieving Trailblazer milestones.
- **Competitive Programming** Solved 400+ Data Structures and Algorithms (DSA) problems across major coding platforms; rated 2-Star on CodeChef.
- **IIT Bombay – Generative AI Workshop:** Completed intensive **2-day** Generative AI workshop at IIT Bombay Techfest covering hands-on model training and large language model fine-tuning methodologies.
- Won **1st place** among **100+** participants in the MasterChef UI/UX design competition at Anantya 2026 (GDGC PCCOE), designing an innovative, user-centered interface in Figma.
